

Factors affecting your total cost of ownership

Cost reduction: power consumption

To maximize your equipment's life cycle and minimize total cost of ownership over time, you need to ensure full reliability and top performance.

What costs you most?

Your initial investment represents a very small part of the decanter's total lifetime cost. However, power consumption can often become a major cost driver during the lifecycle of your decanter.

Savings potential

Regular service optimizes your power consumption and ensures you receive the proper maintenance to secure uptime. With the right service solution from Alfa Laval there are significant savings to be made.

360° service that pays

The best way to minimize the total cost of ownership for your decanter is to use service solutions from Alfa Laval. Our comprehensive 360° service portfolio features offerings specifically designed to reduce your power consumption costs.

By choosing Alfa Laval, you get the perfect long-term partner for your daily operations. Our extensive global service network reaches you anywhere you are.

25% off your energy bill

Power Plates from Alfa Laval give you an easy way to limit your decanter's energy use. They reduce flow-dependent power consumption by up to 25%.

Performance Audit

Equipment upgrades

Preventive maintenance
Spare parts

Training
Troubleshooting
